The Armenians are a nation and an ethnic group originating in the Caucasus(n. 高加索山脉) and eastern Anatolia. A large concentration of them has remained there, especially in Armenia, but many of them are also scattered elsewhere throughout the world (see Armenian diaspora[n. 散居在外的人]). In accordance with(adv. 依照) most western sources, they have populated Eastern Anatolia for over four thousand years. Some western sources maintain that Armenians appeared in Eastern Anatolia as late as 700–600 BC, when nomadic(adj. 游牧的) tribes settled in the former Kingdom of Urartu. Apart from Armenia and Nagorno-Karabakh, there are a large number of Armenians in diasporan communities scattered around the world. The Armenians have had a significant presence in countries such as Russia, Georgia (country) and Iran due to their proximity to Armenia. After the Armenian Genocide(n. 种族屠杀), a large influx(n. 涌入) of survivors fled to France, the United States, Argentina, the Levant and other countries that welcomed the Armenians. There are an estimated 8 to 10 million Armenians around the world. n. 亚美尼亚人

**Phoebe:** He broke that.

**Ross:** Well, he had gravity boots.

Gravity boots are not boots at all, but in fact ankle supports designed to allow a person to hang upside down. Thanks to exposure in television dramas and movies in the 1980s, gravity boots became a common fitness tool in homes across the United States. Today, gravity boots are used by the U.S. Army and have experienced a surge in popularity in 2006 with Da Vinci Code author Dan Brown praising them as well. Several companies manufacture and market gravity boots under various trade names. The purported(adj. 传说的 谣传的) benefits of gravity boots range from the relief of back pain and headaches to increased oxygen flow to the brain. Some people use gravity boots to add an extra challenge to workouts(n. 训练), doing inverted(adj. 反响的 倒转的) crunches or squats(n. 蹲坐), while others such as Uri Geller and Dan Brown use them as tools to help them generate new ideas.

**Rachel:** Yeah, he broke those too.
